

ADAPTER FOR BPCS

SEAMLESS INTEGRATION INTO BPCS

Over time you've made a significant information technology investment into the operations of your manufacturing company by acquiring BPCS/ERP-LX, the feature rich ERP package from Infor. Continuing to realize return on your ERP investment becomes challenging in light of any number of reasons:

- Evolving industry compliance
- Merger and acquisitions
- Additional process requirements beyond BPCS/ ERP-LX capabilities
- Disruptive technologies like RFID, Web Services, and Mobility
- Changing competitive landscapes
- Many others

There are many ways to deal with these types of business conditions, including a complete replacement of your ERP system, whereby swapping certain functionality for similar functionality only gains minimal improvements. That takes time and money that could be used for higher margin return. There is another way!

For more than 15 years, TransitionWorks (TWS) has certified the latest versions of BPCS/ERP-LX and built a high speed adapter to integrate data in and out of BPCS/ERP-LX. We have years of experience using the adapter to integrate BPCS to the shop floor, distribution center, to other ERP systems, to other process systems like WMS, MES, CRM, etc. and to the web.

If you have an internal sales staff and/or customer service representatives that want to break away from green screen data entry, TransitionWorks Software's Sales Visibility for BPCS/ERPLX is the answer.

SUPPORTED BPCS TRANSACTIONS

TransitionWorks' Adapter for BPCS facilitates posting data into the BPCS/ERP-LX system and runs natively on the iSeries or Unix platform. It leverages the high speed framework of our TransitionWorks BPCS adapter technology (Application Integration Enabler–AIE) and bundles super fast posting programs that utilize existing BPCS/ERP-LX capabilities. The Adapter for BPCS (AFB) supports several versions of BPCS including: 4.05CD, 6.x, 8.x and ERP-LX. It consists of a series of RPG ILE programs that either work with existing BPCS posting programs or interface directly with BPCS to provide information related to Inventory, Labor, and Order Management activities.

With its open XML, Web Service or fixed format messaging technique, it is the best available solution in the market to provide a seamless and fast interface to a BPCS/ERP-LX environment. In fact, many of the leading integration infrastructure providers use TransitionWorks' Adapter for BPCS as their BPCS gateway.

ABOUT TRANSITIONWORKS SOFTWARE

TransitionWorks Software delivers innovative solutions that allow warehouse, field service, and sales operations to capture critical information, improve visibility of assets, processes and orders, and interact with their company's ERP system in real-time wherever they are. Using the latest smartphone, RFID, PLC, biometric, barcode and cloud technologies, TransitionWorks' platform is transforming hundreds of customer operations in over 20 countries across the globe. By radically simplifying processes and then putting the latest information in the hands of front-line personnel at all times, its customers make better decisions, reduce inventory levels, lower operating costs and generate higher returns.
