TouchPath

iServ Adapter

for

ERP$_{LX}$/BPCS

SEAMLESS INTEGRATION INTO ERP-LX/BPCS

Over time you've made a significant information technology investment into the operations of your manufacturing company by acquiring ERP-LX/BPCS, the feature rich ERP package from Infor. Continuing to realize return on your ERP investment becomes challenging in light of any number of reasons:

- Evolving industry compliance

- Merger and acquisitions

- Additional process requirements beyond ERP-LX/BPCS capabilities

- Disruptive technologies like RFID, Web Services, and Mobility

- Changing competitive landscapes
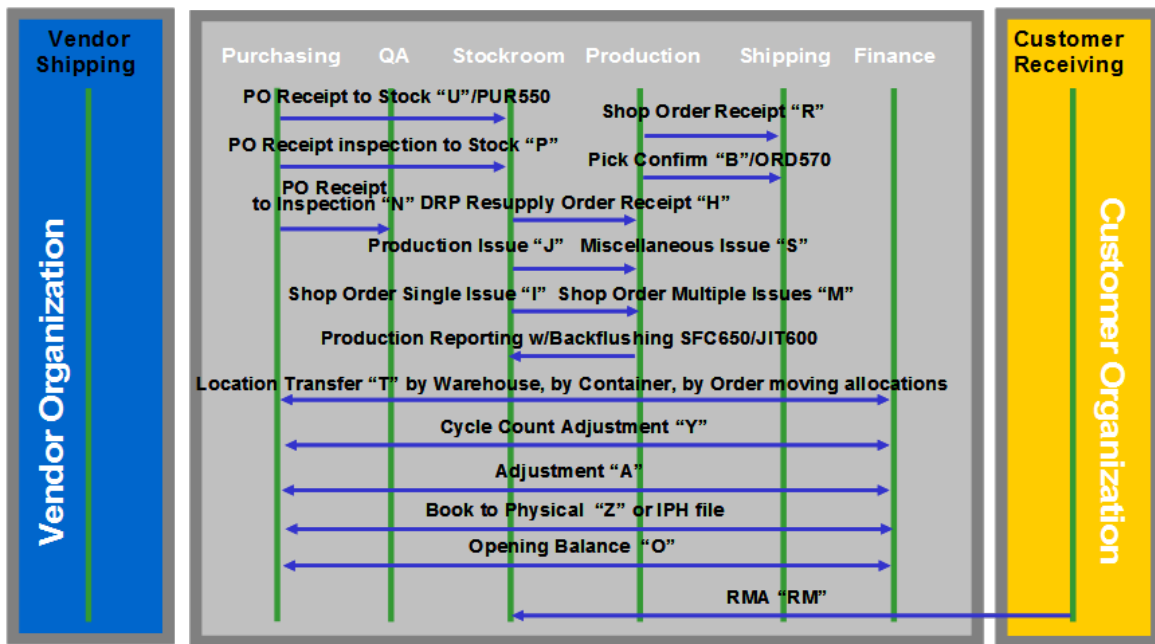

- Many others

There are many ways to deal with these types of business conditions, including a complete replacement of your ERP system, whereby swapping certain functionality for similar functionality only gains minimal improvements. That takes time and money that could be used for higher margin return. There is another way!

For more than 15 years, TouchPath has certified the latest versions of ERP-LX/BPCS and built a high speed adapter to integrate data in and out of ERP-LX/BPCS. We have years of experience using the adapter to integrate ERP-LX/BPCS to the shop floor, distribution center, to other ERP systems, to other process systems like WMS, MES, CRM, etc. and to the web.

TouchPath's iServ Adapter facilitates posting data into the ERP-LX/BPCS system and runs natively on the IBMi (iSeries, AS/400) or Unix platform. It leverages the high speed framework of our TransitionWorks platform adapter technology (iEnabler) and bundles super fast posting programs that utilize existing ERP-LX/BPCS capabilities. The iServ Adapter for ERP-LX/BPCS supports several versions, including: 4.05CD, 6.x, 8.x and ERP-LX. It consists of a series of RPG ILE programs that either work with existing ERP-LX/BPCS posting programs or interface directly with ERP-LX/BPCS to provide information related to Inventory, Labor, and Order Management activities.
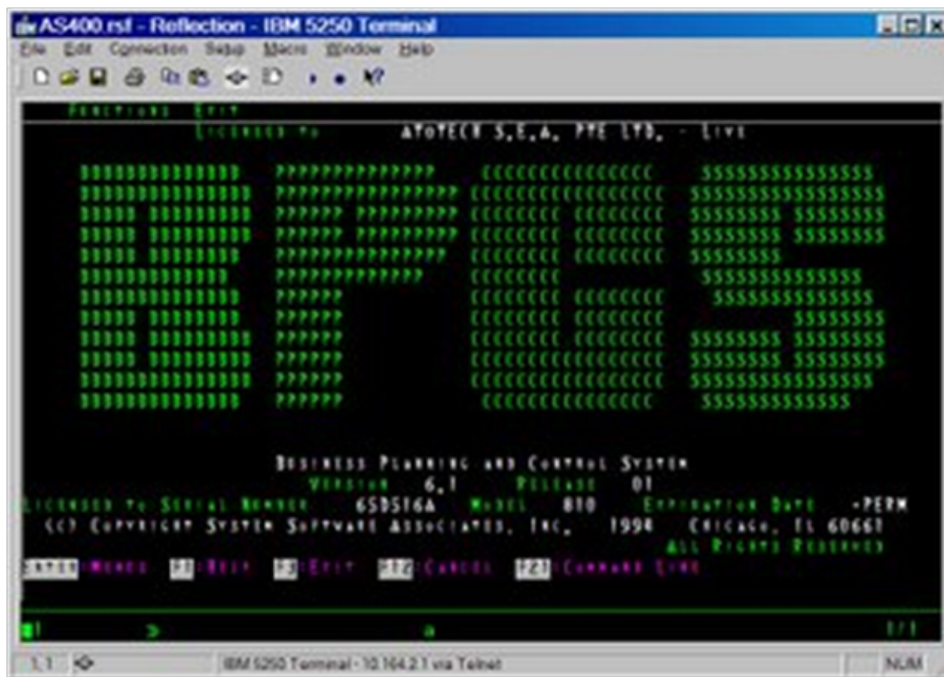

SUPPORTED BPCS/ERP-LX TRANSACTIONS

With its open XML, Web Service or fixed format messaging technique, it is the best available solution in the market to provide a seamless and fast interface to an ERP-LX/BPCS environment. In fact, many of the leading integration infrastructure providers use TouchPath's iServ Adapter as their ERP-LX/BPCS gateway.

TouchPath

BUILT FOR GROWTH

The iServ Adapter for ERP-LX/BPCS is built upon the TransitionWorks iEnabler platform. iEnabler is a message-oriented framework that sends and receives messages via a variety of optional methods including Websphere MQ queues and IBMi data queues. This approach provides a very stable and complete way of asynchronous and synchronous communication enabling support for both real time solutions, as well as, batch based systems. For data synchronization, iEnabler provides an optional database trigger processor that allows the definition of triggers on the servers native database that can be messaged to any external environment. This is usually used for event notification or data replication applications. iEnabler works natively with the IBMi (iSeries, AS/400) platform and DB2 as well as Unix with Informix or Oracle databases.

About TouchPath

Control at your fingertips!

In the warehouse, distribution center, or on the manufacturing shop floor, TouchPath's solutions streamline your processes and operations. With a single touch, you can capture essential shop floor data, manage warehouse processes and better control your inventory and assets. We believe "one size does not fit all", which is why we deliver custom off-the-shelf (COTS) solutions that support your operations, apply your rules and speak your language. In fact, all our solutions are multi-lingual enabling a standard corporate solution to be rolled out globally with no program changes. With TouchPath, you will make better decisions, gain efficiencies, increase customer satisfaction and boost your bottom line.

TouchPath Solutions

- TouchWMS
- TouchInventory
- TouchMES
- TouchSales (Browser Based)
- TouchERP for Sales (Mobile App)
- TouchAsset

- Equipment Maintenance
- Entrance Control
- Facility Evacuation
- Integration Capabilities – ERP-LX/ BPCS, SAP, Oracle, JDE, M3, MS Dynamics, Werum, LIMS, Legacy Systems, etc.
